

Jian Jiang

Toronto, ON | 226-698-7306 | jiangjian9803@gmail.com | linkedin.com/in/jian98

Summary: Engineering professional with a Master's degree and hands-on experience in embedded systems, RF testing, and Python automation. Experienced in collaborating with cross-functional engineering teams in product development and project coordination. Strong technical understanding, communication skills, and a genuine interest in technical recruiting and talent acquisition.

Skills	Details
Programming Languages	C++, Python, C, MATLAB
Embedded & Tools	CAN Bus, Modbus, RTOS, CODESYS, Qt, Git
Communication	Technical Communication, Team Coordination, Requirements

Education

Master of Applied Science in Engineering | University of Guelph | 2023-2025 | Canada

GPA: 3.85/4.0

Bachelor of Science in Electrical Engineering | Hubei University of Technology | 2015-2019 | China

GPA: 3.7/4.0

Experience

Apple Vision Pro/ iPhone 15 (NPI projects)

Radio Frequency Testing Engineer

Pegatron Kunshan Electronic Co., Ltd.

May 2019 - Sep 2020

Luxshare Precision Technology (Kunshan) Co., Ltd.

Sep 2020 - Mar 2022

- Automated RF validation workflows for Wi-Fi and Bluetooth modules using Python, PyVISA, SCPI commands, and lab instrumentation.
- Created automated test sequences for firmware-level RF parameter verification and regression testing; analyzed validation data to support root-cause analysis.

Heavy-Duty Mining Truck Monitoring and Control System - (**NTE360A mining truck** project)

Embedded Software Engineer

MCC Xiangtan Heavy Industrial Equipment Co., Ltd.

Mar 2022 - Sep 2023

- Developed embedded control and sensor acquisition modules for heavy industrial equipment using C/C++.
- Integrated CAN Bus / Modbus communication for real-time data exchange between controllers, sensors, and HMI.
- Built diagnostic and alarm display functions in Qt / CODESYS to support equipment monitoring and troubleshooting.
- Performed system-level debugging and validation with electrical and mechanical teams.

Yanda Canada | K1A & K1B **Piping Project**

Jun 2025 - Present

Document Controller / Python paperwork Automation Support

- Coordinated documentation and communication among engineering, QA/QC, project, and document control teams.
 - Maintained tracking logs for RFIs, drawing revisions, QA/QC records, and document transmittals.
 - Worked with technical teams to clarify requirements, follow up on deliverables, and support project review workflows.
-
